RGD Tech Payment Policy 2026

RGD Tech | Policy and Knowledge Base | Version 2026.1 | Effective 1 July 2026

1. Accepted Payment Methods

RGD Tech supports major credit and debit cards, UPI, and eligible net-banking methods.

Available methods may vary by checkout context.

2. Payment Authorization

A payment may initially be authorized before final capture.

An order should not be treated as fully paid solely because a payment attempt was initiated.

3. Failed Payments

A failed payment may require the customer to retry using an available payment method.

Temporary authorization holds may reverse automatically depending on the payment provider.

Bank or payment-provider reversals may take 3–5 business days.

4. Duplicate Payments

If a customer believes they were charged twice, support should verify payment records before promising a refund.

Confirmed duplicate successful payments should be investigated and corrected according to Finance procedures.

5. Refunds

Refunds normally return to the original payment method.

Payment-provider processing time is outside RGD Tech's direct control.

High-value refunds are subject to the approval requirements in the refund policy.

6. Payment Security

Support agents must never request or store a customer's full card number, CVV, password, or authentication code.

Sensitive payment credentials must remain within approved payment-provider systems.

7. FAQs

Q: How long can a failed card payment reversal take? A: Typically 3–5 business days, depending on the provider.

Q: Where is the amount and status of a customer's payment stored? A: In the transactional payment records.
