RGD Tech Return Policy 2026

RGD Tech | Policy and Knowledge Base | Version 2026.1 | Effective 1 July 2026

1. Return Policy Overview

RGD Tech accepts eligible product returns when the request is made within the applicable return window and the product satisfies the condition requirements.

2. Return Windows

Laptops: 30 calendar days from delivery.

Smartphones: 15 calendar days from delivery.

Tablets: 15 calendar days from delivery.

Accessories: 10 calendar days from delivery.

The delivery date is determined from the shipment record.

3. Product Condition

Products should normally be returned in usable condition with required accessories and packaging.

Serial numbers, IMEI information where applicable, and product identity must match the order record.

Missing accessories may affect the final resolution.

4. Non-Returnable Situations

Products outside the applicable return window are normally not eligible for a change-of-mind return.

Products showing customer-caused physical damage may be rejected.

Products modified or repaired by unauthorized parties may be excluded.

Consumable or hygiene-sensitive accessories identified as non-returnable at purchase are excluded.

5. Defective Products

Confirmed manufacturing defects may qualify for return, replacement, repair, or refund according to the warranty and refund policies.

Customers may be asked to complete reasonable troubleshooting before a technical return is authorized.

6. Return Shipping

RGD Tech normally provides return instructions for approved returns.

When the return is caused by a confirmed RGD Tech error or manufacturing defect, RGD Tech may arrange or reimburse return shipping according to the case.

7. Inspection

Returned products may be inspected before a refund is finalized.

Inspection findings are recorded in the transactional system and can determine whether a return is approved, rejected, or routed for warranty handling.

8. FAQs

Q: Is every product return automatically approved? A: No. Eligibility depends on the return window, product condition, and applicable exceptions.

Q: Where is the status of a particular return stored? A: In RGD Tech's transactional database.
